

HENRY AMOAH

sirrshenry@gmail.com | +233 545698358 | [LinkedIn](#) | [GitHub](#) | Accra, Ghana

EDUCATION

University of Cape Coast

B.Sc. Medical Laboratory Science | CGPA: 3.4/4.0

08/2014 – 05/2018

Cape Coast, Ghana

EXPERIENCE

Blossom Academy (Code4Food Security)

Data Science, AI & ML Fellow

01/2026 – 06/2026

Accra, Ghana

- Built ML models (regression, classification, CNNs, LSTMs) for crop yield estimation and plant disease diagnosis, applying deep learning and time-series analysis to image classification and soil moisture forecasting.
- Shipped a Power BI dashboard tracking household gas stove adoption across rural northern Ghana; deployed two AI-powered ML web apps using Python, Streamlit, and Streamlit Community Cloud.

The Trust Hospital

Senior Biomedical Scientist | IT Focal Officer

10/2019 – 01/2026

Accra, Ghana

- Led QC initiatives achieving a 98% external pass rate in haematological testing; optimised workflows to hit a 99% completion rate across 15,000+ tests quarterly, cutting turnaround time 50%.
- Analysed 7 performance metrics across 13 units to produce quarterly KPI reports that informed management decisions and strengthened leadership visibility.

Royal Triangle Medical Centre

IT Support Specialist

01/2020 – 09/2023

Eastern Region, Ghana

- Co-developed an Electronic Medical Records (EMR) system with a cross-functional team, improving service delivery 40%; managed software installs, updates, and user access controls fleet-wide.
- Maintained computers, networks, and peripherals across multiple units, reducing maintenance costs 37%.

PROJECTS

LabGuide – Lab Test Explainer for Ghana github.com/sirevenn/labguide-ai-bolt | React, TypeScript, Tailwind

- Built an app translating 600+ lab tests into plain language – prep, cost, turnaround, NHIS coverage – mapped to 10 partner facilities.

CropGuard AI – Tomato Leaf Disease Detector github.com/sirevenn/cropguard-ai | TensorFlow, Keras, ResNet50, Streamlit

- Trained a ResNet50 classifier on 18,166 images (9 diseases + healthy); shipped a Streamlit app with confidence scores and treatment guidance at 94% accuracy.

Crop Disease Presence Classifier github.com/sirevenn/crop-disease-presence-classifier | Python, scikit-learn, SMOTE

- Built an end-to-end pipeline predicting disease presence from pest/environmental data, using SMOTE and class-weighted Logistic Regression.

TECHNICAL SKILLS

Programming Languages: Python, SQL

ML Libraries: TensorFlow, Keras, Scikit-learn, XGBoost, Pandas, NumPy, SciPy

Data Visualization: Power BI, Seaborn, Plotly, Matplotlib, Excel

Tools & Platforms: Git, GitHub, VS Code, Jupyter, Google Colab, Zoom, Teams

Certification: Google IT Support Professional (Google / Coursera)

ACHIEVEMENTS

- Overall Best Fellow – Code4Food Security, funded by World Food Programme & KOICA (2026)
- Overall Best Scientist, Laboratory Department – The Trust Hospital Company Limited (2024)
- Best Undergraduate Research Project, Dept. of Medical Laboratory Science – University of Cape Coast (2018)
